Step 3- Now a new window will appear on your screen with multiple options-

## **Export Preference -**

On the top the screen, under this option, you will find two advance properties –

- Create separate PST Files for each DXL file This option will help to generate individual PST files for each DXL file. *Un-checking this option will save all the DXL files in single PST file.*
- Split option for PST File (s) This option will divide the PST file as per your requirement in size.

## Folder Saving Options -

- Import All messages and Maintain Folder Hierarchy Tick on this option if you want to save entire messages with exact folder structure.
- Import All messages in Single Folder Tick on this option if you want to save entire messages in a single folder.

## Destination

Now click on "**Browse**" Option and choose any destination location to save converted DXL files to PST and finally click on "**Export**" Button
