

Get User Manual of NSF Export Tool to Know How to Export NSF Files

Before following the whole procedure of NSF mailbox conversion, firstly download NSF Export Tool and Launch accurately on your computer desktop.

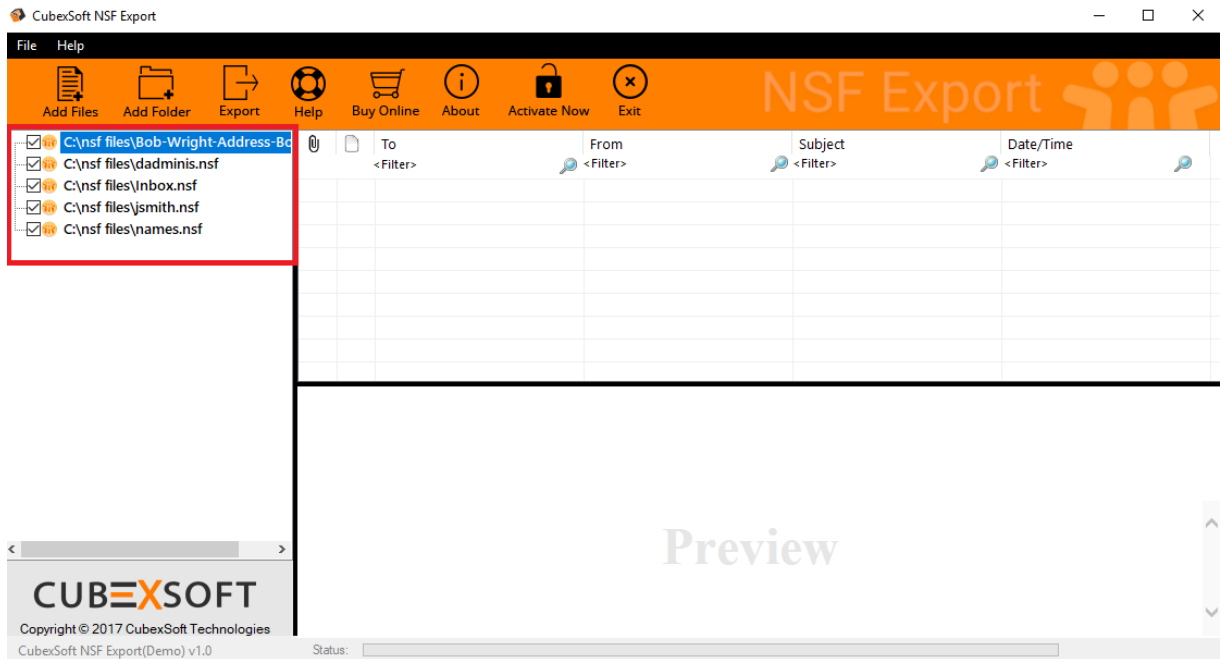

Steps 1. After downloading & installing the NSF Export Tool, the screenshot will be shown as –

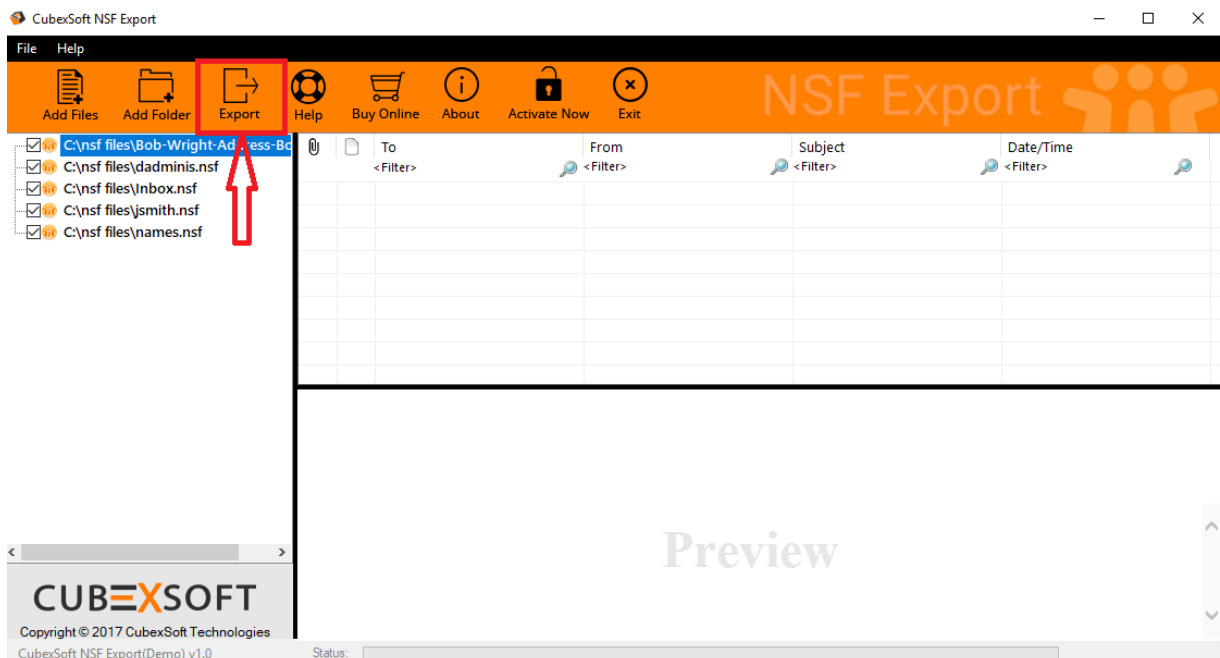

Steps 2. Now you get two options: “Add file” and “Add folder” to browse your NSF files or folder from your saving location.

Steps 3. Now select or deselect NSF files accordingly. Select NSF files which you need to export into different file formats.

Then click on Export button.

Steps 4. After clicking on Export button, a Window will appear with different options carrying sub options i.e. Export All Folders, Export Contacts and Export Calendars.

 CubexSoft NSF Export ×

Export All Folders Skip All Mail Folder

Output Formats :  PST  PDF  EML  MSG  MBOX

File Naming Options :

Export Contacts(Names.nsf)

 Outlook Contacts  VCF or vCard  CSV Format
(Supported by Thunderbird, Windows Live Mail, Yahoo Mail, Gmail)

Export Calendars

 ICS Format

Destination Path :

For PST Format –

If you choose PST option in Export Folders, two sub options will automatically appear i.e. Create Separate PST File for Each NSF file and Split Option for PST file(s).

The screenshot shows the 'CubexSoft NSF Export' window. The 'Export All Folders' radio button is selected. Under 'Output Formats', 'PST' is checked. A red box highlights the sub-options: 'Create Separate PST File for Each NSF file' and 'Split Option for PST file(s)', with the latter set to '100 MB'. Below, 'Export Contacts (Names.nsf)' and 'Export Calenders' are unselected. The 'Destination Path' field is empty, and the 'Convert' button is visible at the bottom.

Export All Folders Skip All Mail Folder

Output Formats :  PST  PDF  EML  MSG  MBOX

Create Separate PST File for Each NSF file
 Split Option for PST file(s)
Split file after  

Export Contacts(Names.nsf)
  Outlook Contacts  VCF or vCard  CSV Format
(Supported by Thunderbird, Windows Live Mail, Yahoo Mail, Gmail)

Export Calenders
  ICS Format

Destination Path :

For PDF Format –

If you choose PDF format for conversion of NSF files, then you will find four sub options to save NSF files into PDF format.

- **Saving PDF** – This option allows you to save separate PDF files for each NSF email or save single PDF file for all NSF emails.
- **File Naming Options** – Select any one option to save NSF files, which is suitable to fulfil your requirement
- **Attachments** – In this option, the software provides two options to save Attachments in PDF 1. Embedded Attachments in PDF file and 2. Save Attachments in separated folder.

CubexSoft NSF Export ×

Export All Folders Skip All Mail Folder

Output Formats : PST PDF EML MSG MBOX

Saving PDF : Save Separated PDF Files for each emails Save All Emails in Single PDF

File Naming Options :

Attachments : Embed Attachments in PDF Save Attachments in Separated Folder

Export Contacts(Names.nsf)

Outlook Contacts VCF or vCard CSV Format
(Supported by Thunderbird, Windows Live Mail, Yahoo Mail, Gmail)

Export Calenders

Destination Path :

For EML, MSG & MBOX Format –

After you select EML, MSG or MBOX format for NSF file conversion, the tool will provide different naming conventions to save the resultant file accordingly:

- **File Naming Options** – Multiple file naming options are available in this option, so you can choose any one option, then click on OK button.

The screenshot shows the CubexSoft NSF Export application window. The 'Export All Folders' section is active, with 'Skip All Mail Folder' unchecked. Under 'Output Formats', 'PDF' is selected, while 'PST', 'EML', 'MSG', and 'MBOX' are unselected. The 'Saving PDF' options are 'Save Separated PDF Files for each emails' (selected) and 'Save All Emails in Single PDF' (unselected). The 'File Naming Options' dropdown menu is open, showing a list of naming conventions: 'Use Original File Name', 'Subject', 'Subject + Date(DD - MM - YYYY)', 'From + Subject + Date(YYYY - MM - DD)', 'Date(DD - MM - YYYY) + From + Subject', 'Date(YYYY - MM - DD) + From + Subject', 'Date(MM - DD - YYYY) + From + Subject', and 'Date(YYYY - MM - DD) + Subject'. A red arrow points to the dropdown menu. Below this, the 'Attachments' section has 'Embed' selected. The 'Export Contacts' section is inactive. The 'Export Calenders' section has 'ICS Format' unchecked. At the bottom, there is a 'Destination Path' field, a 'Browse' button, and a large orange 'Convert' button.

CubexSoft NSF Export

Export All Folders Skip All Mail Folder

Output Formats : PST PDF EML MSG MBOX

Saving PDF : Save Separated PDF Files for each emails Save All Emails in Single PDF

File Naming Options :

Attachments : Embed Attached Folder

Export Contacts(Narrow)

Outlook Contacts

Export Calenders

ICS Format

Destination Path :

And if you want to export Lotus Notes contacts in spite of NSF mails, then there is another section of Export Contacts which can be used to export Names.nsf into different contacts formats:

CubexSoft NSF Export
